

EC SWAP-UP PROGRAM

NIDEC Motors for HVAC-R Applications – Fan & Refrigeration

SWAP-UP your older, inefficient motors for the New Nidec Electronically Commutated motors. NIDEC offers upgrades for your Fractional Single Phase motors (Split Phase, PSC and Shaded Pole motor designs).

What can you expect with the EC SWAP-UP Program?

- EC Motors recently added to several utility rebate programs
- Audit/survey – can be as simple as providing the motor model number
- Application assistance – contact RES Team/Specialists
- Factory or field programming of motor parameters for custom speeds/torques/duty cycles
- Standard Motor Frame sizes are either a drop in replacement or are easily retrofitted on-site
- Additional mounting kits/accessories are offered for ease of installation
- Motors accept a variety of both discrete and variable control inputs
- Custom Kitting and packaging available
