

The next generation of energy efficient LED vanity & stairwell fixtures

RemPhos™ LED LIV Series

The LED Vanity & Stairwell Fixtures by RemPhos Technologies offers an economical alternative to upgrade to long lasting LED lighting, while retaining the simple clean look of traditional wall mount fixtures. The fixtures are powered by our efficient and (in-field) replaceable LED T8 tube light engines. 4ft versions use our DLC approved tubes. Some models can include an optional, integral microwave occupancy sensor which allows the fixture to run at a more energy efficient low light level mode until it senses movement in the area, at which time it raises to full brightness. The LED fixtures are available in 18-48in lengths with either one or two T8 tubes and in multiple CCTs.

All the benefits of a quality LED retrofit:

- Energy savings of >65% (over fluorescent)
- Long life (L70=50,000hrs)
- Reduced maintenance costs
- Superior quality LED light
- Supports digital control systems
- No hum, no flicker, no mercury

Plus the unique benefits of the RemPhos LED Drums:

- **DLC tubes have efficacy >130LPW**
- Unique replaceable/serviceable LED T8s
- Easily mounts to existing ceiling junction box
- Damp environment approved
- Low glare, high uniformity clean white light
- Robust lens and sheet metal prevent breakage
- Environmentally friendly manufacturing process
- Designed in the USA, fixture assembled in the USA
